DETAILED ACTION

Allowable Subject Matter

- 1. Claims 3-4, 9-10 and 13 (renumbered as claims 1-5) are allowed.
- 2. The following is an examiner's statement of reasons for allowance.

Prior art of record fails to teach or fairly suggest a telephone apparatus comprising: a bell signal detector for detecting a bell signal transmitted from a telephone line, an information detector for detecting caller information inserted in a pause period for the bell signal transmitted from the telephone line, a display unit for displaying the caller information received during the telephone call, a memory for storing the transmitted caller information displayed in the display unit, a light source for emitting a plurality of color lights, and a controller for controlling the light source, wherein the light source emits a first color light of the plurality of color lights when the bell signal detector detects the bell signal and the light source emits a second color light or the plurality of color lights when the caller information detected by the information detector coincides with caller information stored in the memory and the light source emits a third color light of the plurality of color lights when the caller information detected by the information detected by the information detector coincides with a telephone number registered in a group as recited in independent claim 1 and shown in figure 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
